

## MANUAL – REPRODUÇÃO DE GRAVAÇÃO DE VÍDEOCONFERÊNCIA

### *FORMATO .WRF (Cisco WebEx Meeting)*

- Não há reprodutores autônomos para *Windows* e *Mac* para o formato “.WRF”. Para baixar o reprodutor WRF no site do *WebEx*, você deverá acessar o link: <https://www.webex.com/video-recording.html>

The screenshot shows a web browser window with the address bar displaying "webex.com/video-recording.html". The page content includes the Cisco WebEx logo, navigation links for Solutions, Webex Devices, Plans & Pricing, and Learn. There are also links for Host, Join, Sign in, and a "Start for Free" button. The main heading is "Get the Webex Player" with the subtext "Watch, share, and edit Webex recordings. Download the player first!". Below this, there are two sections: "Watch a recording" and "Share a recording". The "Watch a recording" section explains that no player is required for email links, but the Webex Player is needed for downloaded files (.ARF or .WRF). The "Share a recording" section states that sharing is easy by posting a link, and editing requires downloading and converting to .WMV. On the right side, there is a small image of a woman working on a laptop with a text overlay that says "Supporting you during COVID-19" and a right-pointing arrow.

- Descer a barra de rolagem e na coluna “.WRF File” clicar em “Windows” ou “Mac OSX” a depender do sistema operacional utilizado no computador ou notebook
